

## SERVICE AGREEMENT

- I. **PURPOSE:** The Westwood Shores Municipal Utility District is responsible for protecting the drinking water supply from contamination or pollution, which could result from improper private water distribution system construction or configuration. The purpose of this service agreement is to notify each customer of the restrictions, which are in place to provide this protection. The utility enforces these restrictions to ensure the public health and welfare. Each customer must sign this agreement before THE WESTWOOD SHORES Municipal Utility District will begin service. In addition, when service to an existing connection has been suspended or terminated, the water system will not re-establish service unless it has a signed copy of this agreement.
- II. **RESTRICTIONS** The following unacceptable practices are prohibited by State regulations.
- A. No direct connection between the public drinking water supply and a personal source of contamination is permitted. Potential sources of contamination shall be isolated from the public water system by an air-gap or an appropriate backflow prevention device.
  - B. No cross-connection between the public drinking water supply and a private water system is permitted. These potential threats to the public drinking water supply shall be eliminated at the service connection by the installation of an air-gap or a reduced pressure-zone (RPZ) backflow prevention device. The RPZ is to be tested upon installation and annually thereafter.
  - C. No connection, which allows water to be returned to the public drinking water supply, is permitted.
  - D. No pipe or pipe fitting should contain more than 0.25% lead (lead free) may be used for the installation or repair of plumbing at any connection which provides water for human use.
